Dear Corey,

I want to give you a preliminary report on our race team's success using your SVVS intake system. This past weekend was our team's first race at Summit Point. Art Diaz took Pepe, our mostly stock Buell XB9R, onto the track for the first time. We were running a stock engine and throttle body with your SVVS intake and the drummer exhaust. The bike performed exceptionally.

Art garnered a first place win in Ultra Light Superbike, a second place in Lightweight GP, and was running mid-pack and catching up in Heavyweight Superbike when he low-sided the bike, ending Pepe's racing for the weekend. Even though the crash put a damper on the weekend, the information we gathered gives us no doubt that achieving the Summit Point overall track championship on our XB9 is well within our capabilities.

Your products, and your assistance have been instrumental in our successes so far. We look forward to a long and successful relationship with you. We'll have some dyno numbers for you on the FUSA weekend at the end of the month.

As I indicated to you on the phone, Sterling Strasser left the race team. I am taking over as coordinator, and will be your primary point of contact. Please don't hesitate to contact me at (866) 810-1993, and I'll be sure to keep you up to date on our progress. I suspect I will also continue to call you to lean on your expertise. Again, I can't thank you enough for your support.

Sincerely,

A handwritten signature in black ink, appearing to read 'Scott C. Farrell'.
